

Classroom News

I will be teaching math to grade 2 Resource Center students, and literacy and writing to grades 1 and 2 Resource Center students.

All literacy students will be given Diagnostic Reading Assessments and placed in appropriate guided reading groups. We will use a multi-sensory approach to teaching letter sounds, blends, digraphs, and syllables. The children will be taught many spelling rules.

All math students will be instructed using enVisions math program on their grade level, using modifications when necessary. We will use many supplemental materials and play many fun math games.
