

## How To Save Your Bookmarks in Mozilla Firefox On a MacBook

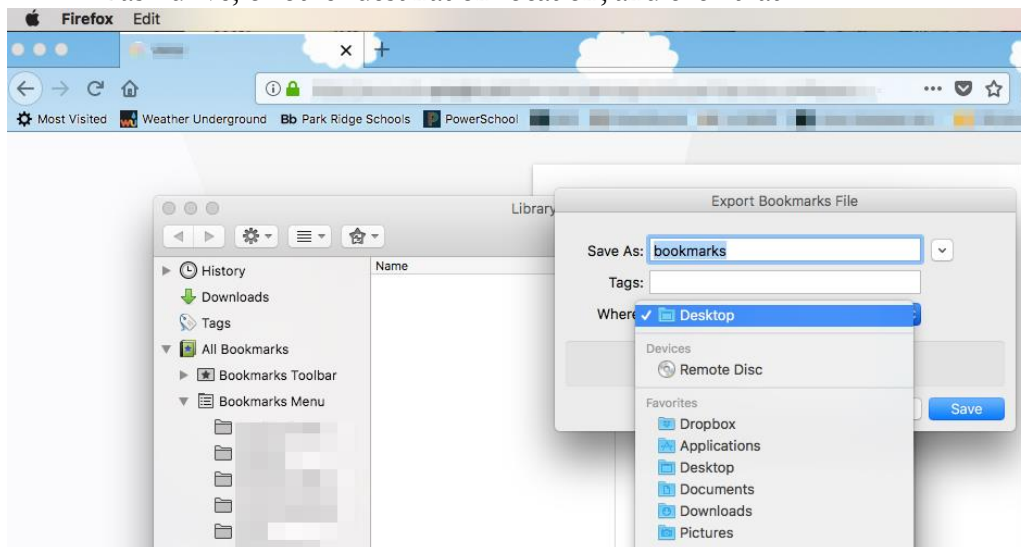

To save and copy your bookmarks from Mozilla Firefox onto a Flash Drive, or other drive, and restore them, follow the steps below:

To EXPORT your bookmarks (this saves them):

1. Insert a flash drive into your computer.
2. Open Mozilla Firefox.
3. On the menu bar, click BOOKMARKS.
4. From the dropdown window, click SHOW ALL BOOKMARKS.
5. On the grey space below the menu bar, click the STAR shaped icon (Import and backup your bookmarks).

6. Click EXPORT BOOKMARKS TO HTML...
7. In the window that opens, go to the WHERE line and click the down arrow. Look for your flash drive, or other destination location, and click that.

8. Click SAVE (the file is called bookmarks.html)

**To IMPORT your bookmarks back into Firefox (this puts your bookmarks back into Firefox).**

To IMPORT your bookmarks (this restores them):

1. Repeat the steps 1 to 5 above except hit IMPORT BOOKMARKS FROM HTML...
2. In the window that opens, go to the WHERE line and click the down arrow. Look for your flash drive, or other destination location, and click that.
3. Click OPEN (bookmarks.html).
4. The bookmarks should be imported at this point.

By using these directions, you can also import and export your Safari bookmarks into Mozilla Firefox or Chrome as well. You only need to remember that the Safari file is called **Safari Bookmarks.html** and Chrome is called **bookmarkswiththedata.html**.
